02 First, Have Some Tea performance, game design

04 Then, DimSum... tablescape

06 Super Art Sunday event identity

08 Type Set! game design

10 /elevator realtime graphics, sound

02 First, Have Some Tea

An interactive game set at a circular dinner table; players are assigned roles inspired by Chinese-American dinner table dynamics.

Menu for ordering conversation starters throughout the game.

Table where the game was performed..

03 First, Have Some Tea

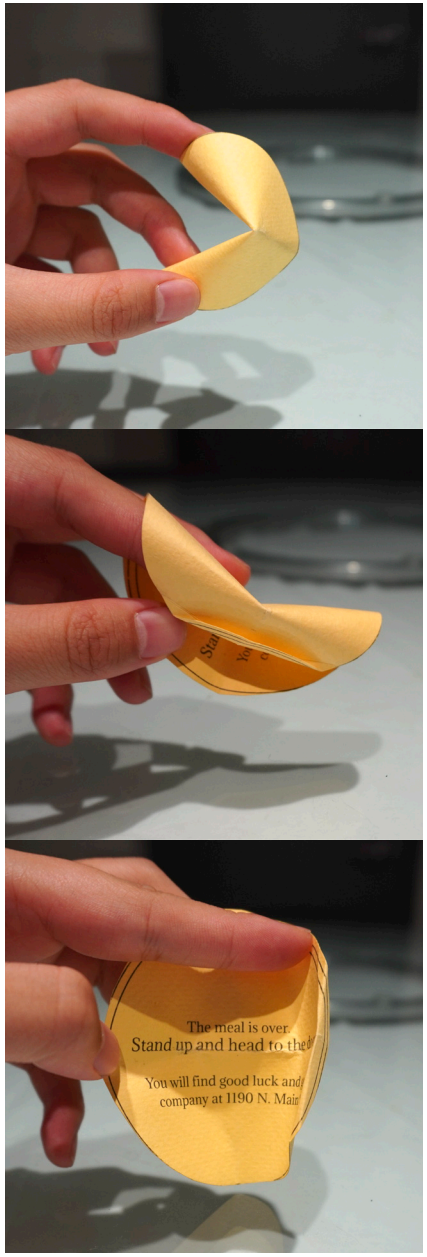

An interactive game set at a circular dinner table; players are assigned roles inspired by Chinese-American dinner table dynamics.

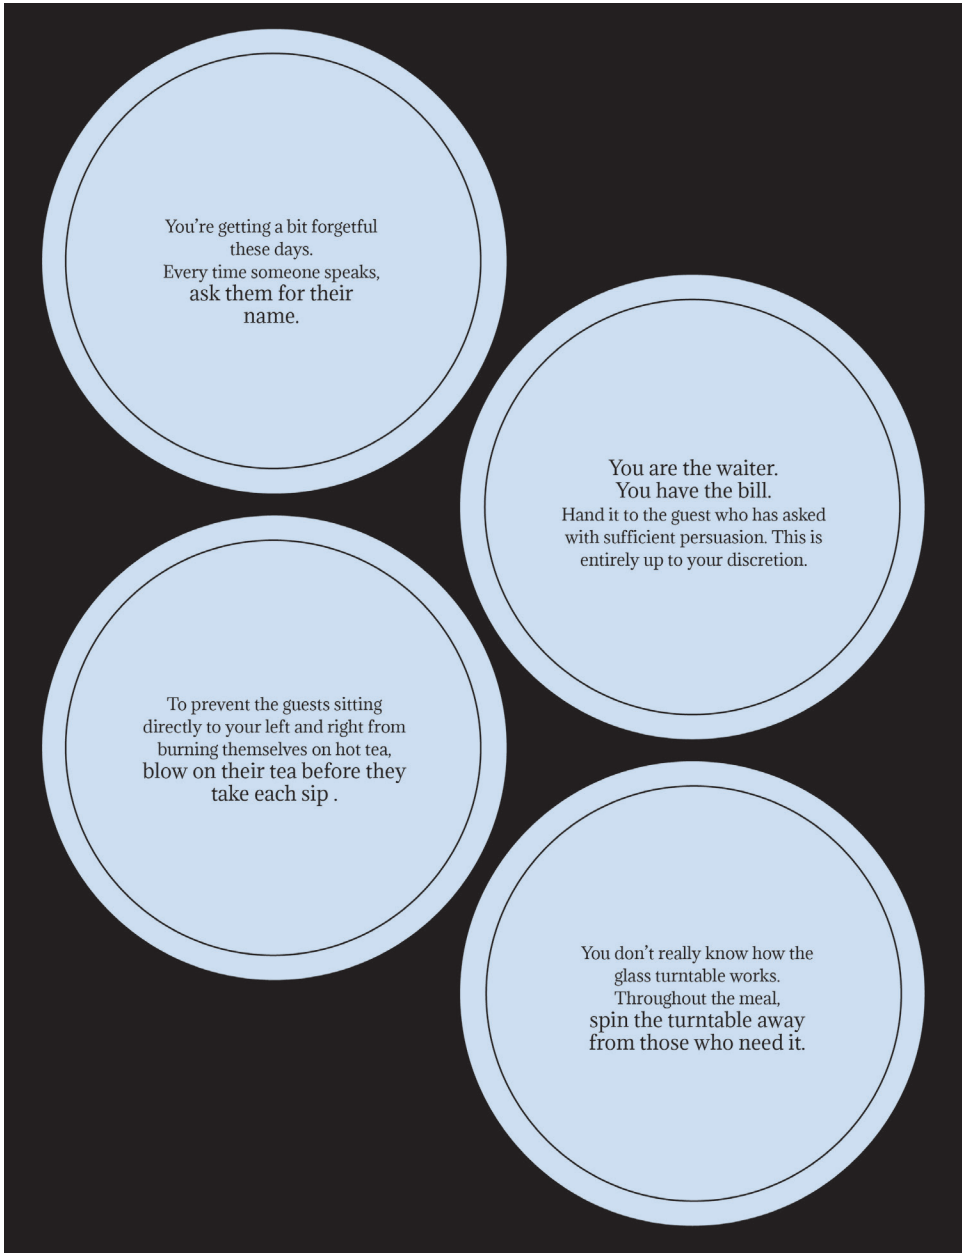

Left: Paper fortune cookies, which released players from the game. Each led the reader to a unique Chinese American restaurant in Providence. The one pictured reads:

"The meal is over.
Stand up and head to the door.

You will find good luck and good company at 1190 N. Main St."

Right: Coasters placed on the table at each table setting. They assigned roles to each player, with ongoing tasks to complete throughout.

04 Then, DimSum…

An alternate visual system for “First, Have Some Tea;” a celebration of dimsum and family-style meals.

05 Then, DimSum…

An alternate visual system for “First, Have Some Tea;” a celebration of dimsum and family-style meals.

Left: Acetate chopstick holders, table topper, placemat, and menu;

Below: Before guests arrived.

In collaboration with Jozie Li.

06 Super Art Sunday

A recurring event at RISD museum for families with young children; developed a new branding system for the event; produced various forms of digital and print ads.

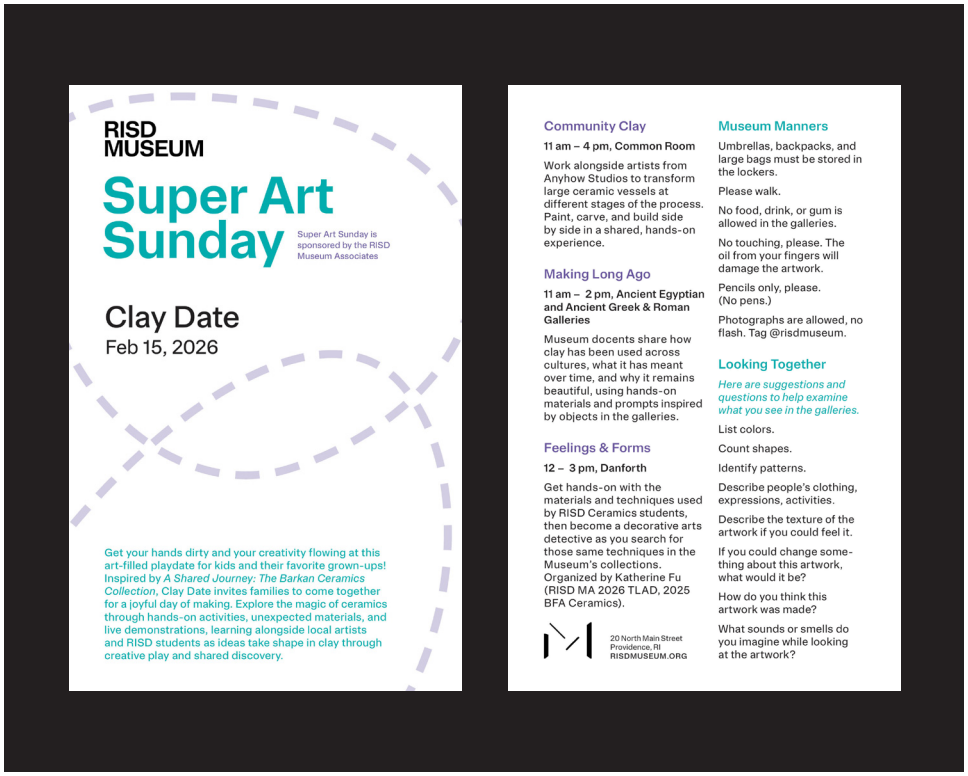

Primary visual for Super Art Sunday.

07 Super Art Sunday

A recurring event at RISD museum for families with young children; developed a new branding system for the event; produced various forms of digital and print ads.

Printed brochure for a particular Sunday, with a list of activities.

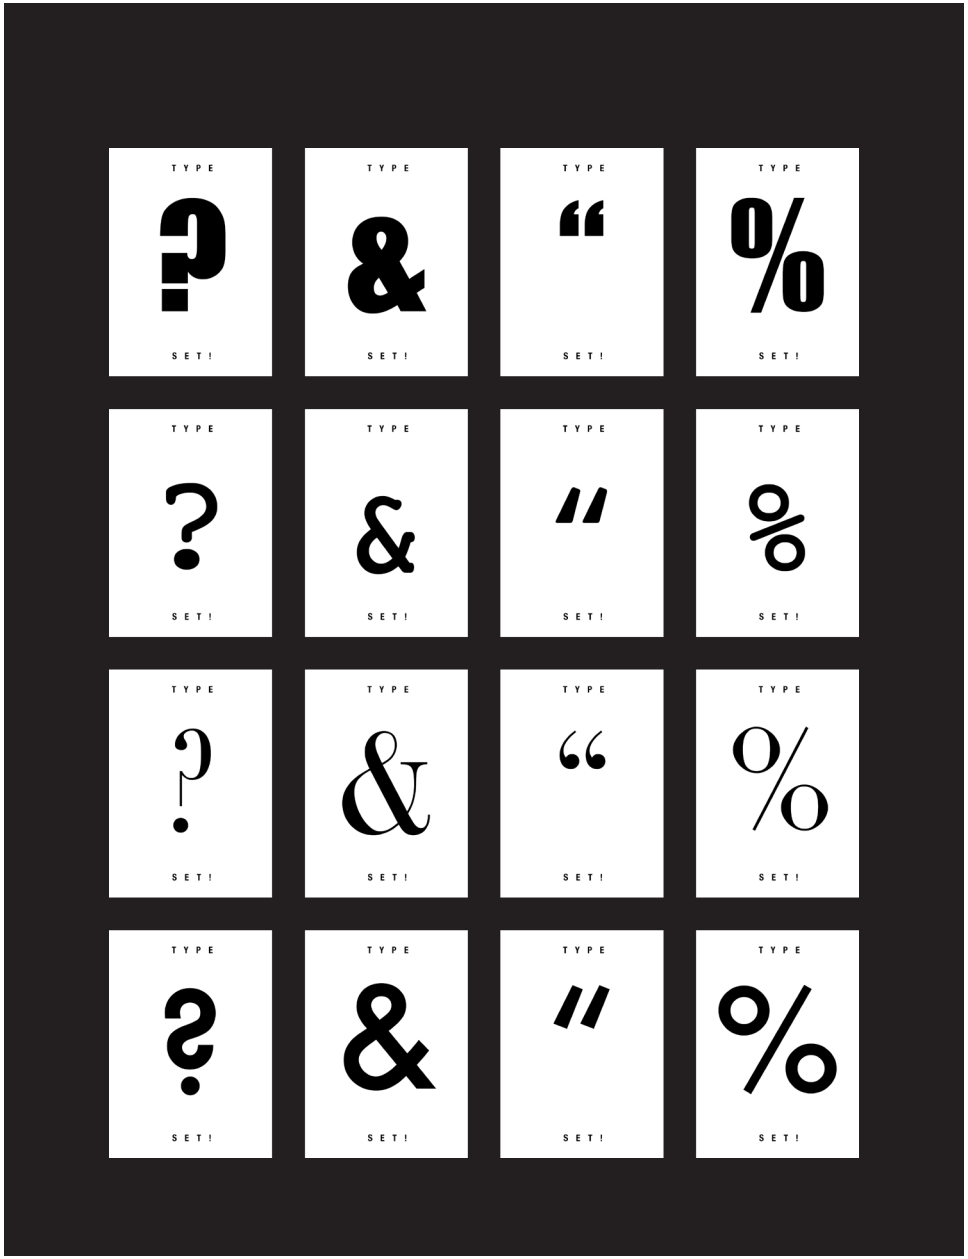

Various digital ads.

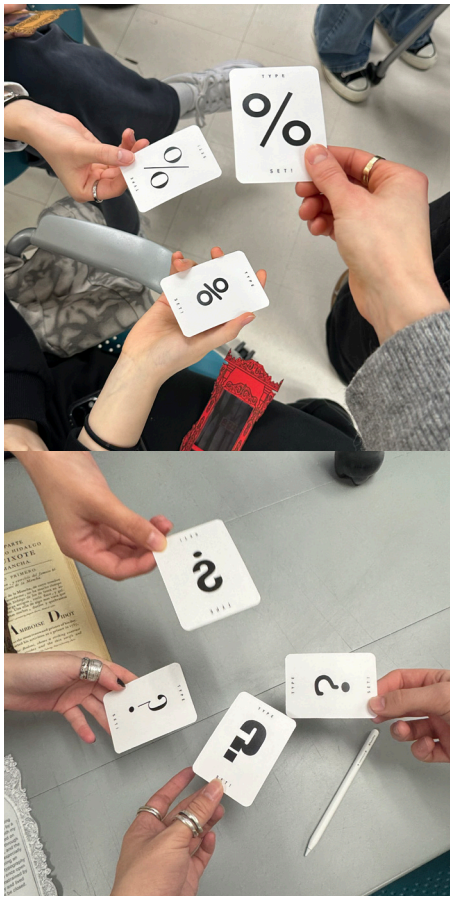

Type Set!

A typographic card game based on the game *SET*.

Played with a group of exactly sixteen participants; one card is assigned to each player.

First, find the set of individuals with the same glyph as you.

Second, find the set of individuals with the same typeface as you.

Type Set!

A typographic card game based on the game *SET*.

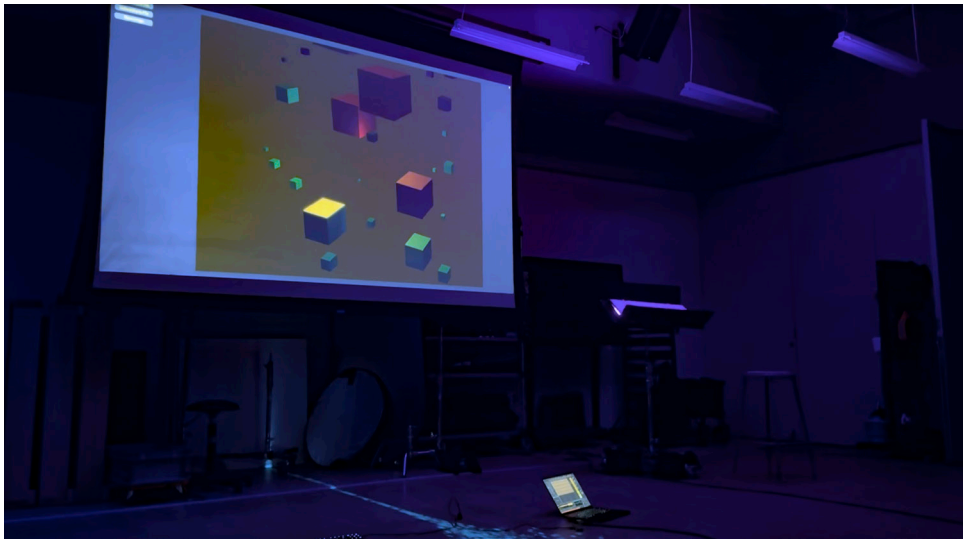

Above: Card sleeves, back cover.

Left: Card holders, inside; a keepsake from the game.

10 /elevator

A playable sound and visual piece that responds to key controls; realtime graphics and primitives coded in C++; I implemented texture mapping and color grading in the scene.

In collaboration with Ethan Lin, Marissa Schaffer, Yohta Kitagawa
